Recent Developments in Sustainable Infrastructure

Select Proceedings of ICRDSI 2019

Series: Lecture Notes in Civil Engineering

- Covers emerging sustainable development technologies in civil engineering
- Discusses cost-effective, eco-friendly, and durable construction materials
- Presents select contributions from the international conference ICRDSI 2019

This book comprises select peer-reviewed proceedings of the International Conference on Recent Developments in Sustainable Infrastructure (ICRDSI) 2019. The topics span over all major disciplines of civil engineering with regard to sustainable development of infrastructure and innovation in construction materials, especially concrete. The book covers numerical and analytical studies on various topics such as composite and sandwiched structures, green building, groundwater modeling, rainwater harvesting, soil dynamics, seismic resistance and control of structures, waste management, structural health monitoring, and geo-environmental engineering. This book will be useful for students, researchers and professionals working in sustainable technologies in civil engineering.
