Dear Dr. Sourav Kanti Addya,

given your outstanding contribution to the Special Issue on Edge and Serverless Computing, the editorial office would like to invite you to become an Editor of Ad Hoc networks (ADHOC).

As Editor and expert in your research area, we appreciate your commitment to handle and review scientific manuscripts submitted to the journal. The expected number of invitations to handle or review varies between journals, but it will typically be between **5-10** invitations per year.

In addition to handle or peer review articles, you will periodically **receive requests for guidance** on issues relevant to the journal, including the scope, recommending new editors and reviewers, identifying topics for special issues, etc. We also hope you will consider submitting some of your own manuscripts to the journal.

The Editorial Board is periodically refreshed; your term will initially **last for three year** but will renew automatically until the Editor-in-Chief and the Publisher determine it is time to refresh the Editorial Board, or you decide to step down.

With kind regards,

Viviana
